Business Intelligence

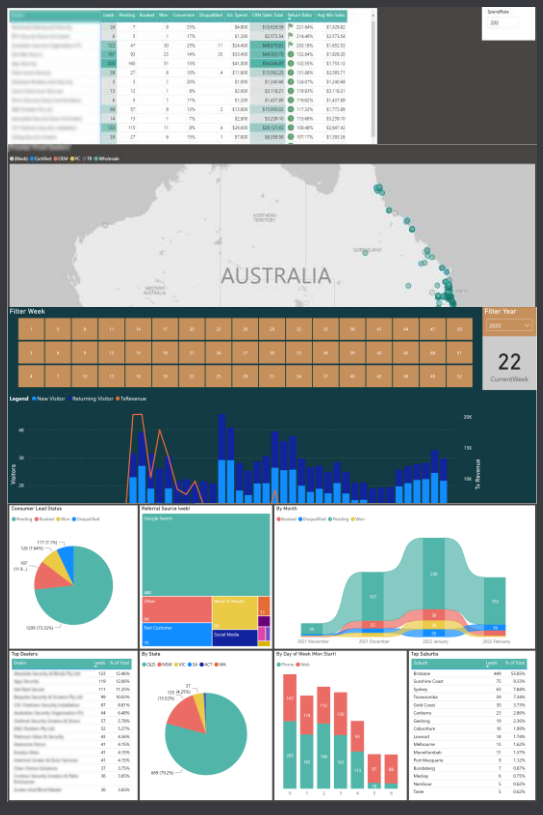
Improve your business performance with information technology.

Empower your BI.

In the digital age your data needs to work as hard as you do to stay competitive. We provide expert skills and experience to help you empower people and experiences with your data using tools such as **Microsoft Power BI**, Excel and the new generation of machine learning capabilities.

Goodspring brings decades of experience designing and building data visualisation solutions across a multitude of operational and executive reporting requirements. From initial planning and data assessment through to deployment we can help you close the gap between your data and decision making.

- Connect to any/multiple data sources, including cloud services
- Structured business reporting and dashboards
- Report design and custom visualisations
- Data interrogation and insights
- Operational, IOT and Big Data reporting
- Excel-based custom reporting and interrogation setups
- Embedded reports and dashboards



Power BI and related tools are great for:

- Executive dashboards
- Operational and management reporting
- Decision support & analytics
- Mechanical / IOT monitoring
- Situational awareness solutions
- Much more…
