

Improve your business performance with information technology.

Accelerate solutions with low-code.

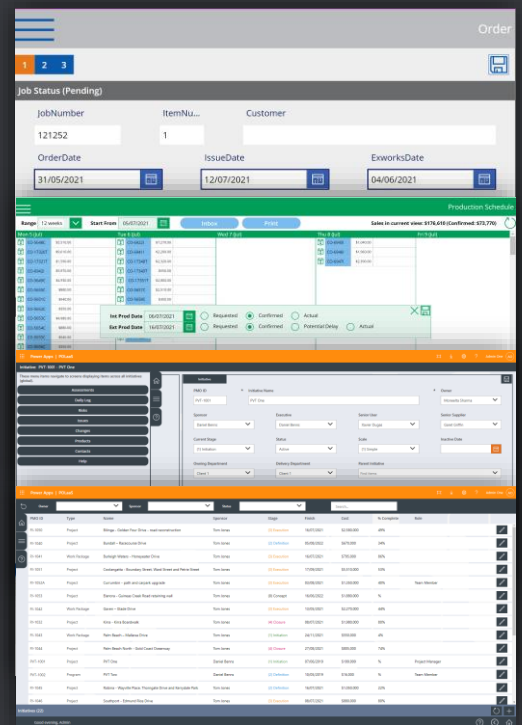

Development of connected business apps has become more accessible with the emergence of low-code platforms such as the **Microsoft Power Platform**. Part of the Microsoft 365 and Microsoft Dynamics family, PowerApps can reduce the time and investment required to reimagine forms and processes into desktop, mobile and Microsoft Teams apps for use by employees and external stakeholders.

Goodspring is a leader in Power Platform solution development and Power Platform governance. We can help you tap the potential of these tools to move away from legacy approaches once and for all, including:

- Desktop and mobile Power App design
- SharePoint, Teams and web-embedded apps
- Custom app components and connectors
- Solution packaging and deployment (ALM)
- Canvas apps, model-driven apps and Power Portals
- Embedded Power BI reporting
- Power Automate & Virtual Agents
- Platform Governance & COE

PowerApps are great for:

- Business Registers
- Asset Management
- Project Management
- Order and sales management
- Simple CRMs
- Field data capture
- Much more...
